Attentional and movement profile

· Sustained attention
· Divided visual and auditory attention
· Impulsivity
· Reaction time
· Motor activity
· Tendency to distraction
· Attention focus quality

Auditory and visual processing profile

Effect of the distractors

Neuropsychological Assessment

Allows to differentiate between different subtypes of ADHD

Differential diagnosis

*Waiting for data of the study

ADHD

Dyslexia

The clinician can design a treatment more adjusted to the patient attentional capacities

Monitoring of the treatment / intervention
